

Where Do Electronics Go To Die?

Join YPIN and some of the foremost authorities in the Puget Sound on October 5 to discuss the impact of common electronic waste practices – and their alternatives – on the world stage!

Craig Lorch, *Co-owner and Founder, Total Reclaim*

Jim Puckett, *Founder, Basel Action Network*

Moderated by Neelima Shah, *Program Officer, The Bullitt Foundation*

Every day, Americans throw out more than 350,000 cell phones and 130,000 computers, making electronic waste the fastest-growing part of the U.S garbage stream.

Recycling the metals contained in those devices cleanly is a time-consuming low margin activity – this prompts much of the developed world to ship its waste abroad where it is stripped and burned with little concern for environmental and human health.

This event is co-sponsored by: **W** | Foster GBC
Global Business Center

For more information about the panelists and the event, please visit the World Affairs Council website at www.world-affairs.org.

- When?** Tuesday, October 5, 2010
6:30 p.m. – Complimentary Networking Reception
