

esoko employment opportunities

Esoko is an award-winning market information platform in 16 African countries. It allows farmers, traders, projects and businesses to use mobiles to manage their businesses and improve access to markets. The software and support is developed in Accra, and we're looking for dynamic people to join our team, build our product and share our vision.

International Partner Manager

A senior role to lead a team of business and product consultants who are supporting Esoko rollouts throughout Africa. Will involve strategy, documentation, training, and deployments. You should be prepared to travel, speak at intl conferences, and support our partners in country with their franchises. Involves consulting with both public & private sectors. French required.

International Sales Manager

An exciting and challenging opportunity to drive an innovation in agriculture across African markets among agri-business, projects and smallholders. You will coordinate a sales team, write proposals, consult with clients, and manage the sales strategy, targets and materials. Selling to governments, franchise partners, multi-nationals etc.

Interface/Web Designer

A key role in developing CSS, XHTML, HTML & JavaScript solutions. You get to design cool stuff for Android and Web. Ability to work fast, attention to detail and high quality output are a must. You should be eager for a fun, high pressure environment which is very iterative -- where imagination & usability skills are rewarded. Illustrator and Photoshop a plus.

Senior Software Engineer

Looking for senior engineers to complement a growing team. Building distributed high performance apps across multiple countries and devices that can scale. Unique opportunity to work in one of Ghana's biggest and most ambitious software shops. API, Java, GWT, datamodeling, design, performance are the key work areas with primary focus on Java/PHP. You must be smart & creative with strong analytical skills and good experience.

Mobile/Android Developer

Excited to develop software applications for mobile devices? Esoko is pioneering rural-based agric mobile apps like prices, inventory, bids, profiling... Must be self-starter and detail-oriented, with good Java foundations and an eye for usability and feature set. Focus on J2ME and the Android SDK. Previous experience in mobile development not required.

Linux Systems Administrator

Got Linux/Unix skills and something to prove? Put your knowledge to use on a large-scale distributed system. Core responsibilities include: installation/management of database, web, mail, voice (VOIP) & sms (SMPP) services. Learn best high-availability, disaster recovery & security practices. Previous experience required.
