

Change seminar presents:

SARAH GIMBEL,
UW Center for Global
Health Nursing

Dr. Gimbel is an established dissemination researcher with extensive experience leading complex, multi-country implementation research in east and southern Africa. Her research expertise includes development and testing of interventions to strengthen health systems to improve the reach and quality of reproductive and child health preventive and clinical services. Dr. Gimbel participated in the design and managed the implementation of the Systems Analysis and Improvement Approach to Optimize pMTCT trial in Kenya, Mozambique and Côte d'Ivoire. She currently is leading a project to adapt a core element of the SAIA intervention for use with mobile-based application in Kenya and Mozambique.

Tuesday, 4/03, 12-1pm,
EEB 037

Lunch provided

Change is an interdisciplinary seminar that highlights research at the intersection of technology and development. We cover topics such as global health, education, microfinance, agriculture, and communication.
