

# CHANGE IT

## Technology for Human Need

Let your degree fit your strengths, vision, and passion.

### ATLAS MS-ICTD

Master of Science in Technology, Media and Society  
Information and Communication Technology  
for Development (ICTD) Track

The first and only degree of its kind in the nation, this two-year interdisciplinary master's program prepares you with technical knowledge and skills to solve the world's biggest development challenges at home and abroad.

This degree enables you to:

- Choose your own adventure from a wide selection of technology and development electives
- Take an interdisciplinary approach to development
- Gain hands-on experience building real-world ICTD projects
- Work with NGOs and ICTD organizations
- Complete your degree with three semesters in residence and a one-semester practicum in the field
