

Organization Description

Dimagi is an award-winning, socially-conscious technology company that helps organizations deliver quality health care to urban and rural communities in over 30 countries around the world. Our team of exceptional software developers, engineers, public health experts and field staff apply their experience in global health care delivery and technology development to further personal and public health and well-being.

Position Description

[Dimagi](#) is looking for Field Managers for our expanding work in India. We are looking for adventurous individuals with an eagerness to work with frontline workforces to deploy technologies designed to improve health care delivery and other services in urban and rural communities.

As a Field Manager, you will travel extensively in India to help deploy CommCare, a mobile phone application for frontline workforces. We have an impressive range of partner organizations across 15 states in India working in the domains of health, agriculture, education, and more. As a Field Manager you will travel to field sites to work with them and their health workers. Your work will include conducting trainings, designing mobile phone applications, conducting research, and providing support for the mobile phone program [CommCare](#). You will join our global team of Field Managers and share lessons learned and expertise from around the world. You'll also receive regular mentorship and support our office in New Delhi.

Position Requirements & Qualifications

Our Field Manager program is designed for people seeking field experience. Field managers receive a salary of 4.8 L per annum and have all of their business travel related expenses reimbursed. We request a 1-2 year commitment, though employment is conditional upon our at-will employment agreement. We require English and Hindi fluency.

You must be an outstanding communicator and problem solver. Any technical skills, research experience, or fluency in other South Asian languages are pluses (note that even though you will be working with mobile phone applications, a background in computer programming is not necessary). The profile of a candidate who will be happy in this position is someone who easily adapts to new environments, enjoys travel and field work, likes to tinker with things, and prefers independence and improvisation to super specific tasks. At Dimagi, you will have freedom to pursue your own interests and grow your skill set as well as strive to make a real impact around the world.

To Apply

If interested, please send your CV and cover letter to dsi-jobs@dimagi.com. Applications will be accepted on a rolling basis. Please indicate "India FM Position" in the subject line of your e-mail.
